AI INVESTIGATION SUMMARY

****Investigation Summary**** This investigation was conducted to assess the risk associated with a debit card transaction made by customer 45978. The transaction details indicate a debit card transaction of 1.0 on 2025-04-14 at 06:30:00 in Lahore. The customer's home location is Faisalabad, and the transaction location is 427.0 kilometers away from their home. ****Decision Justification**** The investigation identified several risk indicators, including a failed transaction count of 2, a previous fraud count of 1, and a distance from home of 427.0 kilometers. These indicators require verification to ensure the transaction is legitimate. The customer's account balance is 26.0, which is sufficient to cover the transaction amount. The transaction type is POS, and the merchant is new. The transaction time is marked as unusual. ****Executive Summary**** A debit card transaction made by customer 45978 on 2025-04-14 at 06:30:00 in Lahore has been identified as a risk indicator. The transaction amount is 1.0, and the customer's account balance is 26.0. The investigation has identified several risk indicators, including failed transactions, previous fraud count, and distance from home. These indicators require verification to ensure the transaction is legitimate. ****Final Recommendation**** Based on the Fraud Score of 50 and Risk Level of Medium, we require additional customer verification for this transaction. This is in accordance with our standard procedures for transactions with medium risk levels. The customer will be contacted to verify their identity and confirm the transaction. The account will be temporarily restricted until the verification is completed.
